

JADEN HISTORY

In February 1996, a plan to establish certification for diabetes educators was begun in Japan. Some diabetes educators and nurses expressed their expectations and concerns for the plan. However, there were no opportunities or venues for them to express their objections to the plan because of a lack of an academic organization through which to do so. This situation created the impetus for establishing an academic society in the field of diabetes education and nursing. Finally, the Japan Academy of Diabetes Education and Nursing was established in October 1996.

The activities of JADEN are continuously expanding. Our annual conference welcomed about 2,500 participants in 2007, 3,000 in 2010, and 4,000 in 2013. Participants from both the academic and clinical fields share their knowledge, discuss, and communicate enthusiastically at the conferences. JADEN expanded and strengthened its organizational foundation and was renewed as a general incorporated association in December 2010.

PAST CONFERENCES

Name	Month	Year	Venue	Number of participants
29th	September	2024	Kyoto (Hybrid)	4,091
28th	September	2023	Okayama (Hybrid)	3,570
27th	September	2022	Osaka (Hybrid)	3,925
26th	September	2021	Kawasaki (virtual)	3,698
25th	September	2020	Iwate (virtual)	3,086
24th	September	2019	Chiba	3,218
23rd	September	2018	Mito	2,423
22nd	September	2017	Fukuoka	2,769
21st	September	2016	Kofu	2,522
20th	September	2015	Takamatsu	2,773
19th	September	2014	Gifu	3,036
18th	September	2013	Yokohama	3,874
17th	September	2012	Kyoto	3,545
16th	September	2011	Tokyo	3,340
15th	October	2010	Tokyo	3,031
14th	September	2009	Sapporo	1,814
13th	September	2008	Kanazawa	2,404
12th	September	2007	Chiba	2,487
11th	September	2006	Kyoto	2,366
10th	September	2005	Fukuoka	1,979
9th	September	2004	Matsuyama	1,965
8th	September	2003	Niigata	1,638
7th	October	2002	Nagoya	1,804
6th	September	2001	Okayama	1,039
5th	September	2000	Yokohama	1,500 or more
4th	September	1999	Takizawa	893
3rd	September	1998	Tokyo	1,044
2nd	September	1997	Yokohama	904
1st	October	1996	Tokyo	250

Japan Academy of Diabetes Education and Nursing

Created 2024/12/24

OUR MISSION

The increasing prevalence of diabetes demands more human resources for patient education by medical professionals such as nurses, nutritionists, pharmacists, technicians, and others. Our mission is therefore to promote research that can be directly applied by diabetes educators and nurses in the clinical setting. We provide opportunities for researchers to share their research findings, clinicians to share their clinical experiences, and others to share their knowledge of diabetes education and nursing. We aim to collect and integrate this knowledge and experience in order to improve diabetes education and nursing.

JADEN ACTION PLAN 2022-2026 (PRIDE)

1. Public awareness and dissemination of information to the public (public awareness)
2. Promotion of research on diabetes education and nursing (research activities)
3. Supporting qualified diabetes education and nursing professionals (inspiring professionals)
4. Preparing diabetes education and nursing for the digital age (digital age)
5. Raising education and nursing competencies in response to the expansion of diabetes education and nursing opportunities (expansion of diabetes nursing)

COMMITTEES

- Editorial Board
- Research Committee
- Education & Training Committee
- Certification for CDEJ Continuous Education Program Committee
- Membership Network Committee
- Public Relations Committee
- Awards Committee
- Policy Committee
- Special Committee
- Future Planning Committee
- International Relations Committee

PUBLICATIONS

The Journal of the Japan Academy of Diabetes Education and Nursing

Books

- JADEN 20th Anniversary Commemorative Publication
- Care protocol for type 2 diabetes patients on insulin therapy
- Nursing guide for prevention of diabetic dialysis
- Diabetes nursing best practices: insulin therapy
- Diabetes nursing manual for disasters
- Foot care skills in diabetes nursing: 3rd ed.
- Training textbook for diabetes specialist nurses
- Poster: Diabetes week and diabetic foot
